

Use the Novel Coronavirus Contact-Confirming Application “COCOA”

What is “COCOA,” the novel coronavirus contact-confirming app?

COCOA is a smartphone application that allows you to receive notifications about possible contact with cases of novel coronavirus.

By receiving these notifications, you will be able to quickly get tested and access other support from health centers. We expect that having many people use this app can help prevent the spread of infection.

“Install the contact-confirming application to protect yourself, your loved ones, your community, and society as a whole.”

Check the below links to the Ministry of Health, Labour, and Welfare site for details and an explanation of how to use the “COCOA” app.
