

# Rules for Waste Disposal

## ① Put waste out before **8:30 AM** on collection day.

Check collection days on the Waste Collection Calendar for your area, and put items out for collection by 8:30 AM on those days.

\*Collection times may differ depending on traffic and available trucks.

Be sure to put your waste out by 8:30 AM. **Waste will not be collected if it is not put out on time.**

## ② Sort waste properly.

Refer to this guidebook for information on how to properly sort waste.

\*Waste will not be collected if not sorted correctly.

If a metal piece over 3 cm is mixed in with Burnable Waste, the machinery at waste processing facilities may be damaged and require lots of money to fix.

Be sure to recycle papers, beverage cans, glass bottles, and PET bottles.

## ③ Write your name on bags and tie them tightly.

Write your name on the designated waste bag and tie it securely to prevent waste from scattering.

\*Waste will not be collected if it does not have a name written on it or is not tied.

**Q: What is the right way to tie bags?**

**A: Tie the right and left handles together tightly.**

**These bags will not be collected.**

- ✗ Handles not tied together securely
- ✗ Taped closed, or tied shut with string
- ✗ Items sticking out of the bag

## ④ Use the right collection area.

**Be sure to leave waste in your designated collection area.**

\*Waste collection areas are managed by the neighborhood associations who install them.

It is forbidden to leave your waste in another neighborhood's collection area without permission.

\*You may dispose of up to 4 things at once (including bags of waste and items with collection tickets).
